

Nihilent
evolving ideas

About Nihilent:

Founded in 2001, Nihilent Inc., a global consulting and solutions integration company, specializes in Data and AI and has an established Business Intelligence and Data Science practice that helps decision makers drive business performance, while also enforcing corporate governance. It is a dynamic, innovative company recognized as one of the fastest growing companies by Inc. 500/5000 and winner of Minnesota Business Magazine's 100 Best Companies to Work For. If you enjoy challenging projects with Fortune 1000 companies, working with cutting edge technology, and want to learn from the best, then Nihilent may be the right fit for you.

Job Summary:

We are looking for a highly motivated candidate who wants to showcase and grow their SharePoint skills. As a SharePoint Architect, you will be responsible for envisioning, designing and implementing solutions using Microsoft's SharePoint platform. You will be involved in understanding customer needs and proposing specific solutions based on Microsoft's SharePoint platforms (WSS 3.0, MSF 2010/2013, MOSS 2007, MSS 2010/2013, Microsoft Business Productivity Online Services, and Microsoft Office 365). You will assist with sales to provide Pre-Sales technical consulting to current and potential customers.

As part of a team involved in understanding customer needs and proposing specific solutions based on Microsoft's SharePoint platform, you will be required to make technical proposals and solution presentations and should be capable of presenting to senior corporate audiences.

Job Requirements:

Successful SharePoint portal architecture, design, installation, configuration and implementation experience using one or more versions of SharePoint. (Microsoft Office SharePoint Server 2007, Microsoft SharePoint Server 2010, Microsoft SharePoint Server 2013 or SharePoint On-line)

- Demonstrated SharePoint Server infrastructure architecture, implementation, and configuration experience
- Degree in Computer Science or related field preferred or equivalent work experience.
- Experience and/or sound understanding of the following:
 - Workflow design and development/ Windows Workflow Foundation
 - Windows and forms-based authentication implementation
 - InfoPath and Forms Services
 - Site architecture and design for Internet, Extranet and Intranet deployments
 - Integration of SQL Server Reporting Services with WSS/MOSS/MSS
 - Understanding of web part customization
 - Good understanding of SharePoint customizations using SharePoint Designer
